READING

3 Read an extract from a story. Number the events (A–E) in the order they are mentioned.

0 _C_

1 ___

2 ___

3 ___

4 ___

A The narrator is aware of people ignoring him.

B The narrator makes a decision to change his life.

~~**C** The narrator sets off on a journey to a village.~~

D The narrator listens to the sounds of animals.

E The narrator bumps into someone he knows.

___ / 4

© 2023 Pearson **PHOTOCOPIABLE**

As always, the valley is bathed in the first rays of sunshine. I breath in **deeply and take in the morning air. As I walk towards the village, I'm** struck once again by the timeless beauty of the valley. The green fields **either side of the path stretch off into the distance, punctuated by the** occasional oak tree or flock of sheep, and I can't help smiling to myself as I **stride along. It's as if I've got no cares in the world, although I know** this is only an illusion. After all, my avatar could be deactivated at any time.

Approaching the village, I bump into Ned who's steering his horse and cart, loaded up with fruit and veg for the market. 'Morning Harry,' Ned calls **out cheerfully, 'How are you this glorious morning?' Before I get to** reply, he starts chattering away about the solar-powered generator that's **going to be installed in the village. According to him, it's going to** revolutionise village life. 'The last thing we need here is a revolution,' I say **with a chuckle. At the same time, I can't help remembering the social** unrest I'd experienced in my past life.

Before going our separate ways, Ned throws me a shiny red apple from his cart. Waving goodbye, I take a large bite and carry on. it feels like **another perfect day, until I glance up at the small hill which keeps** guard over the village. Long ago I decided it was better not to focus on the **tall metal structure sitting on the top it, its single red light flashing on** and off. It was there in my past life, too, the red eye blinking as if to say, 'I'm **watching you.' As soon as it catches my eye, I'm immediately** transported back to the past. Gone is the sleepy atmosphere I've grown **used to. Neighbours hurry by without so much as a glance, unable to** shift their eyes from their smartphones. In fact, the only things aware of **anyone else's existence are the surveillance cameras on every corner.**

© 2023 Pearson **PHOTOCOPIABLE**

That was the beginning of the end really, although I only became aware of it **when the birds disappeared from the rooftops. When I was a kid, you** could always hear them singing their morning songs, but, over time, the **music became quieter and quieter. After the bees went as well, it didn't** take long for the food chains to break down. Admittedly, I'd never been a fan **of fruit and veg, but I became uneasy when they started disappearing** from the supermarket shelves. After that, everything spiralled out of control **at breakneck speed. The government had no choice but to impose** strict laws in an attempt to control theft and violence. The surveillance **cameras monitored our every movement, and curfews ensured the** streets were deserted at night. Dystopia had always seemed to belong in **science fiction novels, but here I was, experiencing it first-hand. That's** why uploading my personal biodata to the system wasn't a hard decision to **make. There was nothing left for me there.**

Coming back to 'reality', the red eye carries on blinking sleepily, but no **longer is it threatening me. Instead, it's telling me that everything is** OK. The birds aren't going to disappear and nor will Ned with his cart of fruit **and vegetables. The alternative reality system is still active and my** avatar will get to live another day in paradise.

© 2023 Pearson **PHOTOCOPIABLE**

4 Read the extract again. Are the statements True (T) or False (F)?

0 The narrator has never realised how beautiful the valley is before. **_F_**

1 Ned believes a piece of technology will have a minor impact on life in the village. ___

2 The narrator describes someone standing on the small hill next to the village. ___

3 The narrator starts reminiscing about the past when he looks at the metal structure. ___

4 The narrator first realised something bad was happening when he couldn't see any birds. ___

___ / 8

WRITING

5 Match the topic sentences for an opinion essay (1–4) with the examples and ideas (A–E).

0 We have failed to tackle the most serious threats to the planet. **_D_**

1 Large corporations have continued to invest in fossil fuels. ___

2 Vehicle emissions have also seen consistent growth. ___

3 We must also consider the damage being caused by marine pollution. ___

4 We should not give up hope just yet. ___

A While investment in oil and coal has decreased, investment in gas has continued to rise since the 1960s.

B It is thought that there are hundreds of thousands of tonnes of plastic waste floating around in our oceans.

C We have a strong survival instinct and a history of overcoming challenges.

~~**D** The most serious are changing land use, climate change and marine pollution.~~

E This is despite the availability of non-polluting electric vehicles.

___ / 4

© 2023 Pearson **PHOTOCOPIABLE**

6 Read the essay question below and write your response.

> **'By 2050 most jobs will be automated and most people will be out of work.'**

To what extent do you agree with this opinion and what alternatives to work might there be?

Write your essay in 200–260 words.

___ / 12

TOTAL: ___ / 40

x 1.25 = ___ / 50

Part C • Speaking

SPEAKING

1 Describe and compare the pictures showing people doing experiments. Why might the people be doing experiments in these situations?

___ / 10

2 Answer your partner's question.

___ / 5

3 Listen to your partner talk about their pictures.

Ask: To what extent might using this technology have revolutionised or changed people's lives?

___ / 5

TOTAL: ___ / 20
