

PREPARATION

1 **Look at the picture on the right and answer the questions.**

see

1 What can you see?

think

2 How far in the future do you think this could be?

3 Would you like to travel in time to see it? Why/Why not?

wonder

4 What do you think life would be like in this city? Think about the things in the box.

transport work free-time the environment how people look/dress technology health and medicine education

800,000 years into the future!

'The time machine turned over and I was thrown through the air. For a moment I forgot what was happening, then I found myself sitting on soft grass in front of the machine. Heavy rain was falling and everything seemed grey. I was on a small **lawn**, surrounded by **bushes** with purple flowers. In a moment I was wet to the skin. "A nice welcome," I thought, "to a man who has travelled 800,000 years to see you."

'Soon I stood up and looked around me. The rain was stopping and the sky was growing lighter. Then I suddenly realised the full danger of my journey. What might appear when the rain stopped? What might people be like? Had they perhaps changed into something **inhuman** and very strong? I might seem like an old-world wild animal, but more frightening because I looked like them – a horrible creature to be quickly killed.

'Already I saw the shapes of enormous buildings, trees and hills. I turned quickly to the Time Machine and tried hard to turn it the right way up. As I did so, the grey rain suddenly stopped and the sun shone through the clouds. My fear grew stronger and I fought with the machine and it turned over again. It hit my chin hard. One hand on the seat, the other on the starting **lever**, I stood breathing heavily, ready to climb inside it again.

'But now I had a way of escaping, my confidence returned. I looked with more interest and less fear at this world of the future.

'Then I heard voices coming nearer. Through the bushes I saw the heads and shoulders of running men. One of these appeared on a path leading straight to the lawn where I stood. He was quite thin, just over a metre high, wearing only a long purple shirt with a leather belt. He seemed to be very beautiful, but also very weak. When I saw him, my **confidence** returned. I took my hands from the machine.'

GLOSSARY

lawn *n.* an area of short, cut grass
bush *n.* a small tree
inhuman *adj.* horrible and cruel, without human feelings
lever *n.* a handle on a machine that you move to work the machine
confidence *n.* the feeling of believing in yourself

COMPREHENSION

2 LL8.01 **Listen and read the extract from The Time Machine by HG Wells. Are the statements true (T), false (F) or not given (NG)?**

1 The Time Machine was damaged by the journey into the future. .....
2 The Time Traveller had expected people to be there to meet him. .....
3 He decided to kill anyone who looked wild or strange. .....
4 The Time Traveller hurt himself when he tried to move the Time Machine. .....
5 The Time Traveller was not afraid of the man because he didn't look strong. .....
6 The Time Traveller's mood changed a lot in his first minutes in the future. .....

LISTENING

3 LL8.02 **Listen to what the Time Traveller found 30 million years into the future. What is happening to the Earth?**

GLOSSARY

dull *adj.* the opposite of bright
darken *v.* to get darker
lifeless *adj.* dead, without life

ACTIVE INVESTIGATION

4 **HG Wells was one of the first to use the idea of a machine that can travel in time when he wrote The Time Machine in 1895. Find other TV shows, films or books that use the idea of a time travelling machine. What kinds of machine did they use?**

SPEAKING

5 **Work with a partner and look at the words in the box. Talk about how each thing could be a problem if you travelled in time. Which one would be the biggest problem?**

money bacteria and illness clothes
language getting older documents

CLIL CONNECTION
Science

6 LL8.03 **Listen to the second part of the story again. The Time Traveller sees what will happen to the Earth when the Sun dies.**

1 Find out what scientists think this will be like. How is it different from the book?
2 When do scientists predict this will happen?
3 What other things might end the world as we know it before the Sun dies?
