Blog: My life as a video games tester
By Jemima Godfrey

A lot of readers have been asking me what it's like being a games tester. In this blog post, I'm going to tell you so you can decide whether it's the job for you.

1 ___
I used to think games testers just sat around trying to complete video games while eating snacks. It seemed ideal because it didn't involve any work! In reality, it's a full-time job and I hardly ever play the whole game unless I've finished working on it. I check for bugs, or problems, so I usually play the same levels over and over again. Sometimes I've got to concentrate on the characters or, at other times, the sound. If I find any bugs, I have to report them to the game developers.

2 ___
I've always loved video games and I used to rush home from school to play them. My dream was to be a programmer so I could create games. However, I'd never learnt how to program, so being a tester was the next-best option. At first, I used to test games at home and, although I didn't get paid for it, I appreciated having the chance to play the newest games. After I'd done that for a while, I was offered paid work for a games studio in town.

3 ___
We don't have a fixed schedule, although we're supposed to do eight hours a day. I don't usually start until midday so I've got time to go to the gym in the morning. Unless I'm starting a new project, I don't need to speak to my boss when I get in. I just sit down at my desk and start working. If I've got to get a lot done, I stay there for the rest of the afternoon, trying to avoid any distractions. If not, I'll take a break to have a chat with my teammates.

4 ___
The main benefit is being involved in something I love. Even if I'm not responsible for making the games, it's essential to test them before they're released to the public. My studio has produced some amazing games and I'm proud to be part of it. Apart from that, there are plenty of opportunities to advance within the industry. I'm learning all the time so I'll probably be able to get a better job when I've got more experience.

5 ___
The main disadvantage is the short-term contract, which only lasts a few months. Unless I do something wrong, I'll get more work at the end of the project, but I'd rather have a permanent contract. It's OK for now because I'm still young and I enjoy my job. I might feel differently when I'm older and I've got more responsibilities, though.
