MOBILE TECHNOLOGY

I remember my first mobile phone. It was huge, but the screen was quite small when you think about the smartphones of today. I could only use it for calls and messages. At the time, however, it looked so great to me. Can you imagine how it changed people's lives? Suddenly, with this useful little invention, communication was so easy. Now we have smartphones with digital cameras and Internet. Mobile technology is always getting better. I wonder what the next generation of mobile phones will be like.

1 The author of the text is considering
A why phone technology is important.
B how good new mobile phones are.
C how mobile phones have changed.

THE SCIENCE OF THE STARS

On a clear night, you can see the Moon and stars. How many are there? We don't know. Where does space end? Does it end? We don't know. Astronomers, however, are looking for answers to these important questions that affect us all. They observe the sky and analyse their data. They discover new stars and planets. They also develop theories to explain what space is and Earth's place in it. For these reasons, astronomy is one of the most interesting sciences in the world. But why are there so few astronomers? Why aren't young people keen on learning about it?

3 The text explains
A the science of astronomy.
B why there aren't many astronomers.
C how astronauts change our lives.
