## OVERVIEW

**Duration:** 40 minutes

**Objectives:**
- Can give dates (e.g. their date of birth) using ordinal numbers in the form day-month-year or month-day-year (GSE 28 – A1).
- Can use a range of common time expressions with *past/to* and fractions (GSE 31 – A2).
- Can use a range of time expressions with whole numbers (+ *o'clock*) (GSE 27 – A1).

**Resources:**
- SB pp. 11, 139
- WB p. 11

# LESSON 8

## WARM-UP | 5 minutes

(S–S) Review numbers from 1–100 by doing some counting activities. Ss count in multiples of two, e.g. *two, four, six,* etc., then in multiples of three, e.g. *three, six, nine*, etc. then – five, e.g. *five, ten, fifteen*, etc. They could do this around the class, or in groups of 4–6. Rather than going around in order, give Ss a ball or soft object: the first S says a number, e.g. two, then throws the ball to the person they choose to say the next number, and so on.

## PRACTICE | 25 minutes

1 (S–S, T–S, S–T) Ss do Exercise 1 individually. Give them 2–3 minutes to complete the names of the days of the week and put them in the correct order and then 1 extra minute to check their answers in pairs. When they have finished, refer Ss to p. 139. Play the recording so that Ss listen and check their answers. Practise the days using choral drilling and individual repetition.

2 (S–S, T–S, S–T) Play the recording so that Ss listen and repeat the names of the months. Then refer Ss to Exercise 2 and give them 2 minutes to match the months with the seasons in their country. Ask Ss to check their answers in pairs before doing a class check.

### EXTRA ACTIVITY

Call out a month and the class shouts out the following month. For example: T: *May*, Ss: *June*; then T: *October,* Ss: *November,* and so on. The same can be done for days of the week.

3 (T–S, S–T) Refer Ss to Exercise 3 and look at the clocks. Then play the recording so that Ss listen and repeat the times. Revise the rules for how to tell the time. Go through the REMEMBER THIS box with the class and make sure Ss understand.

### EXTRA ACTIVITY

Take in a large toy clock with moveable hands. Pass the clock to a S who sets the time, then chooses another S and asks: *What time is it?* If that S answers correctly, the clock is passed to them to set the time, and so on.

4 (S–S, T–S, S–T) Ss do Exercise 4 individually. Play the recording so that Ss listen and write the times. Then give them 1 extra minute to check their answers in pairs before doing a class check.

5 (T–S, S–T) Refer Ss to Exercise 5. Play the recording so that Ss listen and repeat the ordinal numbers.

6 (T–S, S–T) Refer Ss to Exercise 6. Play the recording so that Ss listen and choose the dates they hear. Then give them 1 extra minute to check their answers in pairs before doing a class check.

7 (S–S, T–S, S–T) Refer Ss to Exercise 7. Go through the REMEMBER THIS box with the class and check understanding. Then play the recording so that Ss listen and write the dates. Ask Ss to check their answers in pairs before doing a class check.

8 (T–S, S–T) Refer Ss to Exercise 8. Elicit the dates from different Ss. Then ask what these dates are famous for. Elicit ideas, but do not confirm them. Play the recording so that Ss listen and check their ideas.

## PRODUCTION | 7–8 minutes

(S–S, S–T, T–S) Refer Ss to Exercise 9. Tell Ss that in a few minutes, they will ask and answer the questions. Give Ss 1–2 minutes to prepare individually. Then put Ss in pairs and give them 3 minutes to ask and answer the questions. While they do this, monitor, identify problems and take notes. When they have finished, invite individual Ss to share the answers. Then give some feedback based on your notes.
