Part B • Listening, Reading and Writing

LISTENING

1 [Audio UT6.01] Listen to two teachers talking about things that have gone wrong in their language school. Number the topics (A–E) in the order they are mentioned. The first one has been done for you.

A Mistakes are made by everyone on occasion. ___

B A mistake might have cost someone their job. ___

C An unfortunate mistake resulted in an expert getting annoyed. ___

D A mistake was made when setting a task for some students. **_1_**

E One particular mistake had an economic cost. ___

___ / 4

2 [Audio UT6.01] Listen again. Circle the correct answers (A or B).

0 How did Sophie feel about the results her students got in an exam?

A She was pleased they'd achieved such high marks.	B She was surprised they hadn't done as well as expected.

1 Why did Alan put a plastic sheet in the photocopier?

A He'd been asked to by the director of the language school.	B He made the assumption that he'd be able to do it correctly.

2 What was the result of Alan trying to print on a plastic sheet?

A His colleagues were unable to use the photocopiers for some time afterwards.	B He was able to use the photocopier when it'd stopped overheating.

3 What was Alan taught by the incident with the photocopier?

A You should avoid blaming other people for things.	B You should be careful about who's allowed to use technology.

4 What does Sophie say about a mistake the director made?

A It happened because he was trying to connect two electronic devices.	B It was impossible for Robbie to locate the files in either the computer or the server.

READING

3 Read an article in which three family members discuss technology. Tick [✓] the points (1–4) that are mentioned and put a cross [x] beside those which are not.

0 Some teachers at Mina's school are opposed to using digital technology. **x**

1 Mina has changed her mind about the value of learning coding at school. ___

2 Simon sometimes gets annoyed with the way Mina refers to him. ___

3 Simon prefers traditional ways of preparing economic forecasts. ___

4 Violet is concerned for elderly people who may not be able to access important services. ___

___ / 4

What does technology mean to you?

Three generations of the same family tell us what technology means to them.

The daughter: MINA (17) – student

I'm what's known as a digital native as I've been brought up surrounded by **internet technology. At school digital skills are used in almost all the** subjects. Not only can we access huge amounts of information, but we also **reinforce the concepts we learn with online exercises. Although some** teachers struggle with it, the school insists that all our homework is assigned **via the school's platform which is also used for communication** between teachers, pupils and parents. I can certainly see how it's a more **effective way of keeping people informed.**

We're also being taught coding at school, which has been interesting. At **first, I couldn't see the point because I didn't want to become a** programmer. Not only that, but I found it hard to be so precise when **inputting code. I've never had an eye for detail so I was always slipping** up. Lately, though, I've started to get into it and I can see why it might be **useful in future. People forget that a lot of us digital natives know little** more than how to swipe left and right on a phone, so it can't be a bad thing if **we learn how the technology actually works.**

© 2023 Pearson **PHOTOCOPIABLE**

The father: SIMON (49) – economist

Mina always assumes that I know nothing about computers because of my **age. She calls me a 'digital foreigner' because she knows it rubs me up** the wrong way! Although the internet hadn't been invented when I was a **child, I did grow up with computers. In those days, you had to program** the games yourself and I'd spend hours carefully typing in code. That's **probably more than can be said for today's generation of youngsters.** Nevertheless, computers have evolved enormously and are capable of **processing much more information nowadays. My field of work has** been revolutionised by them because while we determine the factors for **economic forecasting, the programs do all the hard work, which would** have been done with pencil and paper in the old days. We shouldn't place **too much trust in technology, though, because things can go wrong.** That said, it's been proven that humans are far more likely to miscalculate **when it comes to economics than computers are.**

© 2023 Pearson PHOTOCOPIABLE

The grandmother: VIOLET (76) – volunteer

Although I'm a bit of a dinosaur, not only am I used to technology, but I've **even got a virtual PA on my smartphone which syncs with my tablet** and my smartwatch. I have never been so organised as reminders are sent **straight to my smartwatch. It is also handy for keeping up with friends.** For me, the increased speed and ease of communication is the most **exciting aspect of technology. It must be hard for digital natives like** Mina to really appreciate how this has changed the world.

On the other hand, we often forget that some people have been left behind like some of the elderly people I do voluntary work with. My role is to **help them access the support and services they have a right to** through the online procedures which they often struggle with. For me, it's **essential that technology is accessible to everyone. Under no** circumstances should people's lives be made harder because of it.

© 2023 Pearson **PHOTOCOPIABLE**

4 Read the article again. Are the statements True (T) or False (F)?

0 Mina thinks technology can help her understanding of the ideas she learns at school. **_T_**

1 Mina and Simon agree that some young people lack technological skills. ___

2 Simon's unconvinced by the argument that humans are more prone to errors than computers. ___

3 Simon and Violet both have a negative attitude towards technological development. ___

4 Violet lacks confidence when it comes to using different electronic devices. ___

___ / 8

WRITING

5 Match (1–4) with (A–E) to complete the formal phrases for complaining.

0 Please see the **_E_**

1 I hope you understand my frustration ___

2 I am writing to express my considerable ___

3 I look forward to hearing ___

4 It was clear that the product was not ___

A at not having been informed of the delivery date.

B fit for purpose.

C disappointment with your service.

D from you soon regarding this matter.

~~**E** attached order form for confirmation.~~

___ / 4

6 You have recently signed up to a new internet provider and are disappointed with the service.

Write an email of complaint. Explain:

- **why you are writing.**
- **what the problems are.**
- **what the desired outcomes are.**

Write 200–260 words.

___ / 12

TOTAL: ___ / 40

x 1.25 = ___ / 50
